

Breezy Kalama

AI Automation & Voice Agent Specialist

✓ Available for Remote & Relocation

Nairobi, Kenya | breezykalma04@gmail.com | linkedin.com/in/breezy-kalama-6369b1235 | github.com/breezykalama

PROFESSIONAL SUMMARY

AI Engineer specializing in conversational AI, voice agents, workflow automation, and enterprise integrations. Experienced building AI-powered customer support systems, WhatsApp/SMS conversational assistants, RAG systems, and multi-channel automation pipelines using Python, FastAPI, OpenAI APIs, Azure OpenAI, Twilio, and n8n. Author of **MCPGen** (PyPI: `openapi-mcpgen`) — an open-source framework for generating secure, policy-aware AI agent servers. Proven ability to independently deliver production-ready AI solutions in remote distributed environments across banking, insurance, and telco clients. Open to fully remote roles and relocation worldwide.

EXPERIENCE

AI Engineer

NTT DATA Inc. · Feb 2025 – Present · Nairobi, Kenya

- Designed and implemented AI-powered automation and conversational AI systems for enterprise clients across banking, insurance, and telecommunications.
- Built RAG-based systems for contextual customer interactions and operational decision support.
- Developed workflow automation pipelines using n8n and UiPath, reducing manual operational effort.
- Designed and integrated REST APIs connecting AI systems with enterprise services and backend platforms.
- Structured operational workflows and internal knowledge bases to improve AI response quality and automation accuracy.
- Delivered AI solutions independently in agile, distributed remote environments.

Software Tester Engineer

Microsoft via Techno Brain · Jul 2024 – Jan 2025 · Nairobi, Kenya

- Executed functional, regression, integration, and performance testing across Windows OS builds.
- Identified defects, documented reproducible issues, and collaborated with engineering teams to improve release quality.
- Applied QA methodologies that strengthen AI automation reliability, workflow validation, and production readiness.

PROJECTS

Driving School Copilot [Conversational AI Customer Automation Platform](#)

[OpenAI APIs](#) · [Azure OpenAI](#) · [Twilio](#) · [FastAPI](#) · [React](#) · [MySQL](#)

- Built a role-aware AI assistant platform supporting web chat, WhatsApp/SMS customer communication, conversational analytics, and lesson booking workflows.
- Integrated Twilio WhatsApp/SMS messaging for omnichannel customer communication across web and mobile channels.
- Implemented OpenAI/Azure OpenAI conversational reasoning with deterministic business logic for safer, more reliable operational responses.
- Designed conversational booking, rescheduling, and cancellation workflows with instructor availability validation.
- Built persistent conversation history for contextual follow-up interactions and continuity across sessions.
- Structured FAQs, operational workflows, and customer interaction data to improve AI automation accuracy.
- Built backend API architecture for assistant execution, messaging channels, and operational integrations.

MCPGen [v0.5.0](#) · github.com/breezykalama/mcpgen · [PyPI: openapi-mcpgen](#)

[Python](#) · [FastAPI](#) · [OpenAPI](#) · [MCP Protocol](#) · [httpx](#) · [sentence-transformers](#) · [pytest](#)

- Built and published an open-source framework generating secure, policy-aware AI agent servers from OpenAPI specifications.
- Designed AI orchestration workflows with safe execution controls, semantic routing, auth passthrough, rate limiting, and audit logging.
- Implemented production-grade backend architecture focused on reliability, modularity, and scalable AI integrations.
- 66+ passing tests. Published and actively maintained on PyPI — `pip install openapi-mcpgen`.

TECHNICAL SKILLS

Conversational AI & Voice

Voice Agents, Chatbots, Conversational AI, AI Agents, Omnichannel Messaging, WhatsApp/SMS Automation

Automation & Integrations

OpenAI APIs, Azure OpenAI, Twilio, n8n, UiPath, Workflow Automation, Business Process Automation, REST APIs

Cloud & Azure

Azure AI Services, Azure ML, Cosmos DB, Azure Data Factory, Microsoft Fabric, Azure OpenAI

AI & ML

RAG Systems, LLM Integration, Prompt Engineering, Embeddings, Semantic Search, Vector Databases, Multi-Agent Architecture

Backend Engineering

Python, FastAPI, SQL, MySQL, System Design, Audit Logging, Rate Limiting, Observability, OpenAPI, MCP Protocol

Frontend & Testing

React, Web Chat Interfaces, Functional Testing, Integration Testing, Regression Testing, QA Methodologies

CERTIFICATIONS · MICROSOFT AZURE

AI-102 – Azure AI Engineer Associate

DP-420 – Azure Cosmos DB Developer Specialty

DP-700 – Azure Data Engineering / Analytics

AI-900 – Azure AI Fundamentals

DP-100 – Azure Data Scientist Associate

DP-600 – Fabric Analytics Engineer Associate

DP-900 – Azure Data Fundamentals

AZ-900 – Azure Fundamentals

EDUCATION

BSc Computer Science (In Progress)

St Paul's University, Nairobi

Diploma, Computer Science

St Paul's University, Nairobi · Oct 2020

Remote Work: Proven ability to deliver independently in distributed async environments. Available across time zones. Open to relocation to UK, EU, US, Canada, or anywhere globally.
